Technology Acceptable Use and Security Policy Non-Employee

The Technology Acceptable Use and Security Policy (“AUP” or “policy”) applies to any person or entity (“User”) granted access to or use of the District’s computer network and facilities. To gain access to District computers, facilities, network, software applications, and the Internet, Users must review and agree to abide by the terms of this SFUSD Technology Acceptable Use and Security Policy.

1. Educational and Business Objectives

District computers, networks, software applications, electronic mail, voice mail and other computer, electronic and telecommunication technologies and facilities are to be used solely for SFUSD business and educational purposes.

2. SFUSD Property

All technology devices, software, and equipment configurations are owned by the San Francisco Unified School District. All files stored on SFUSD equipment and back-up devices are considered to be property of the SFUSD, and materials developed by individuals in the course of carrying out their professional responsibilities to the District shall be the property of SFUSD, unless otherwise contractually agreed. All equipment, software and business files must be returned immediately upon termination of the relationship with SFUSD.

3. Use is a Privilege

Use of the District’s computing and networking resources is a privilege. The SFUSD and the individual schools reserve the right to restrict or terminate network and internet access at any time

4. No Expectation of Privacy

Users of the SFUSD computer network system (including, but not limited to, email and the internet) have no explicit or implicit expectation of privacy.

5. Confidentiality of Information

Technology may provide access to information which is confidential. SFUSD requires that all individuals maintain absolute confidentiality in all electronic student, employee, and application matters. Access to confidential information REGARDING DISTRICT STAFF OR STUDENTS is authorized ONLY when individuals have a legitimate business need to access the information to fulfill his or her professional responsibility, and for which they have been explicitly authorized to access.

6. Liability

The SFUSD makes no assurances of any kind, expressed or implied, regarding any computer or internet services provided.

7. Security and Passwords

A User in whose name a network account is issued is responsible at all times for its proper use, and such User shall access the system only under the account number that has been assigned to him/her. Passwords must never be shared. To share a User ID and/or password exposes the authorized User to responsibility for actions the other party takes with the password and ID. Users must take reasonable steps to ensure the security/privacy of their passwords, including changing the password periodically, selecting a password that is complex and known only to the User, and never displaying the password in a public place.

8. Appropriate Behavior

Individuals are responsible for appropriate behavior on the SFUSD's computers, business systems, network, and the internet, and must adhere to all relevant federal, state, and local laws, as well as SFUSD policies, regulation and procedures. Users who disregard these requirements and guidelines may have their privileges suspended or revoked, and appropriate legal or disciplinary action taken against them. Users granted access to the network through the SFUSD's computers assume personal responsibility and liability, both civil and criminal, for uses of the network not authorized by this AUP and the SFUSD's guidelines. The district does not sanction any use of its computer systems or the internet that is not authorized by or conducted strictly in compliance with this policy. The SFUSD retains the right to remove from its information systems any material it views as offensive or potentially illegal.

9. Enforcement

Any violation of this AUP may be cause for restriction or revocation of network access privileges. In addition, the User shall be responsible for incidental and consequential damages resulting in whole or in part from the violation(s). Nothing in this AUP shall constitute a waiver or limitation of any rights, which the District may have under applicable law.

Request for Technology Access for Non-Employee
 (To be completed by an SFUSD employee)

Non-employees may be granted access to SFUSD technologies, including the SFUSD network, email system, web site, and/or databases with the approval of an SFUSD Site Administrator/Department Head and the Chief Technology Officer. **Generally, this access will be granted only when a Board of Education approved contract or memorandum of understanding (MOU) that includes language on confidentiality of district information has been executed.** However, limited access may be granted to individuals who are assisting SFUSD schools or departments with work that is deemed not to present a serious risk.

Responsible SFUSD Employee

Each request for non-employee access must be associated with an SFUSD employee. This employee is responsible for defining the level of access required, supervising the work of the non-employee, and addressing any misuse of SFUSD technology access. He/she must also inform the SFUSD Department of Technology when the access is no longer required. In the event that the responsible person is no longer an employee of SFUSD, access will be terminated until new forms are submitted identifying a replacement responsible SFUSD employee.
